

IRIMANOA Nampoina Hiarijaona

CURRICULUM VITÆ

manoa576@proton.me | +261 38 96 332 09 | Antananarivo, Madagascar

github.com/ma-noa | @manoa_ramanantsoa (TikTok)

Mathematician and builder drawn to the deep structures underlying computation, numbers, and logic. Work spans real analysis, abstract algebra, and the intersections where pure mathematics meets code. The most interesting problems live at boundaries. Let $\varepsilon > 0$ be given.

§ 1. Education

École Normale Supérieure (ENS)

L2 — Pure Mathematics

2023 – present

Antananarivo, Madagascar

- ▷ Real analysis, abstract algebra, linear algebra, number theory
- ▷ Formal mathematical training pursued alongside independent software engineering

Baccalauréat Scientifique, mention Bien — Saint Joseph School, Ambohimandroso

2023

Baccalauréat A2, mention Assez Bien — Future Generation School, Amparafaravola

2022

§ 2. Selected Works

CEYS Encryptor

github.com/MA-NOA/Ceys-Encryptor · Open Source

2025

C++ · Number Theory · Linear Algebra

- ▷ Keyless symmetric encryption architecture; explores cipher design and byte-level manipulation in C++
- ▷ Bridges ENS coursework in number theory with applied systems programming

Major Cry

Design support for vertical rescue operations

2025

L^AT_EX · Social Support

- ▷ Technical coordination documentation typeset in L^AT_EX; source pending release

Portfolio

github.com/MA-NOA/portfolioReact

2026

React · Vite · Design

- ▷ Personal site where mathematics, code, and aesthetics intersect

§ 3. Technical Competencies

Languages

TypeScript, Go, Python, C++, SQL, Rust (*learning*)

Frontend

React, Next.js, Vite, Tailwind CSS, D3.js, Figma

Backend

Node.js, PostgreSQL, Redis, gRPC, REST

Infra

AWS, Docker, Terraform, GitHub Actions, Datadog

Mathematics

Real Analysis (*adv.*), Abstract Algebra (*adv.*), Number Theory, Topology

Other

L^AT_EX (*proficient*), Cybersecurity — Cisco Certified Ethical Hacker

§ 4. Languages

Malagasy Native · French Fluent (academic) · English Professional

§ 5. Research Interests & Goals

Clean architecture · Developer tooling · Type theory · Formal methods · Cryptography · Mathematics outreach

$\forall \varepsilon > 0, \exists \delta > 0$ such that this résumé fits within one page. Q.E.D.
